INDEX

Chapter-1: Introduction to Web development and Django 1

Chapter-2: Django & Atom Installation and Development of First Web Application 6

Chapter-3: Django Templates and Static Files 21

Chapter-4: Working with Models and Databases 34

Chapter-5: Working with Django Forms 50

Chapter-6: Working with Django Model Forms 66

Chapter-7: Working with Advanced Template Features 75

Chapter-8: Session Management 83

Chapter-9: User Authentication and Authorization 103

Chapter-10: Class Based Views and CRUD Operations by using both CBVs and FBVs 112

Chapter-11: Django ORM 138

Chapter-12: Working with Advanced Model Concepts 146

Chapter-13: Working with Django Middleware 155

Chapter-14: Deployment of our application in the Live Environment 163

Chapter-15: Real Time Project: Blog Application Development 173

Chapter-16: Introduction to Web application Development by using Flask 198

DETAILED INDEX

1) **Introduction to Web development and Django 1**
   - ❖ Web Application 2
   - ❖ Front-End 2
     - HTML 2
     - CSS 2
     - JavaScript 2
     - Static Response vs Dynamic Response 3
   - ❖ Back-End 3
   - ❖ DJango.. 3
   - ❖ Top 5 Features of Django Framework 4
     - Fast
     - Fully loaded
     - Security
     - Scalability
     - Versatile

2) **Django & Atom Installation and Development of First Web Application 6**
   - ❖ How to install django 7
   - ❖ ATOM IDE/Editor 7
   - ❖ Speciality of ATOM IDE 7
   - ❖ How to configure Atom for Python 8
   - ❖ Django Project vs Django Application 8
   - ❖ How to create Django Project 9
   - ❖ How to run Django Development server 10
   - ❖ How to send first request 11
   - ❖ Role of Web Server 11
   - ❖ Creation of First web application 11
   - ❖ Activities required for Application 13
   - ❖ Http Request flow in Django Application 15
   - ❖ Summary of sequence of activities related to Django Project 15
   - ❖ How to change Django Server Port 16
   - ❖ Various Practice Applications 16
   - ❖ Defining urlpatterns at application level instead of project level 18

3) Django Templates and Static Files 21

- Django Templates 22
- Python stuff required to develop Template Based Application 22
- Steps to develop Template Based Application 23
- Template Tags 24
- Application to send date and time from views.py to template file 25
- Application To display date ,time and student information 26
- Application to wish end user based on time 27
- Working with Static Files 28
- Process to include static files inside template 28
- How to include css file 30
- DURGASOFT NEWS PORTAL-Mini Project 30

4) Working with Models and Databases 34

- Database configuration 35
- How to check django database connection 35
- Configuration of MySQL database 36
- Configuration of Oracle database 36
- Model Class 36
- Converting Model class into database specific sql code 37
- How to see corresponding sql code of migrations 38
- How to execute generated SQL code (migrate command) 38
- What is the advantage of creating tables with 'migrate' command 39
- How to check created table in django admin interface 39
- Creation of super user to login to admin interface 39
- Difference between makemigrations and migrate 39
- To display data in admin interface in browser 40
- MVT Diagram 42
- Important FAQs related to Model and database configurations 42
- Faker Module 42
- Working with MYSQL Database(studentinfo project) 43
- Working with MYSQL Database and Faker Module(studentinfo project) 45

5) Working with Django Forms 50

- Django Forms 51
- Advantages of Django Forms over HTML forms 51
- Process to generate Django forms 51
- CSRF(Cross Site Request Forgery) Token 53
- How to process input data from the form inside views.py file 54
- Student Name and Marks Submission Form Project(formproject1) 54
- Student FeedBack Form Project 56
- Form Validations 58

1. Explicitly by the programmer by using clean methods 58
2. By using Django inbuilt validators 59

- How to implement custom validators by using the same validator parameter 60

- Validation of total form directly by using a single clean method 60
- How to check original pwd and reentered pwd are same or not in Signup Form ... 61
- How to prevent requests from BOT 63

6) Working with Django Model Forms 66

- Model Forms(Forms based on Model) 67
- How to develop Model based forms 67
- How to save user's input data to database in Model based forms 68
- Demo project-1(modelformproject) 68
- Demo Project-2(movieproject) 69
- How to add date widget 74

7) Working with Advanced Template Features 75

- Template Inheritance 76
- How to implement template inheritane 76
- Demo program: advtempproject 76
- Advantages of Template Inheritance 77
- How to add seperate css files to child templates 78
- Tempalte Filters 79
- Syntax of Template Filter 79
- How to create our own filter 80
- Template Tags for urls 82

8) Session Management 83

- Session Management 84
- Session Management By using Cookies 84
- How to test our browser supports Cookies or not 84
- Application-1:Session Management by using Cookies (PageCount Application) 85
- Application-2:Session Management by using Cookies 86
- Application-3:Session Management by using Cookies 88
- Limitations of Cookies 90
- Temporary vs Permanent Cookies 90
- Application-4:Session Management by using Cookies(Shopping Cart Application) 91
- Session Management By using Session API(Django Session Framework) 93
- Useful Methods for session Management 95
- Application-1:Session Management by using Session API(PageCount Application)95
- Application-2:Session Management by using Session API(Profile Application) 96
- Application-3:Session Management by using Session API (Shopping Cart Application) 99
- Important Methods related to Session 101
- Browser Length Sessions and Persistent Sessions 102

9) User Authentication and Authorization 103

- User Authentication and Authorization 104
- Difference between Static and Media Folders 105
- How to configure media folder in settings.py file 105
- Authentication Application 106

10) Class Based Views and CRUD Operations by using both CBVs and FBVs 112

- Class Based Views(CBVs) 113
- HelloWorld Application By using ClassBasedViews 113
- Template Based Application by using Class Based Views 114
- How to send context paramters 114
- ListView 114
- How to create template file for ListView 115
- How to provide our own context object name 116
- How to configure our own template file at project level 116
- DetailView 116
- Django CRUD Operations 119
- CreateView class 120
- UpdateView class 121
- DeleteView class 122
- Django Class Based Views Complete Example-1(cbvproject7) 124
- Django Class Based Views Complete Example-2(cbvfinalproject) 127
- CRUD Operations by using Function Based Views(FBVs) 131
- Differences between CBVs and FBVs 137

11) Django ORM 138

- Django ORM 139
- How to find Query associated with QuerySet 139
- How to filter records based on some condition 139
- Various possible Field Look ups 139
- How to implement OR Queries in Django ORM 141
- How to implement AND Queries in Django ORM 141
- How to implement NOT Queries in Django ORM 142
- How to perform Union operation for query sets of the same or different models142
- How to select only some columns in the queryset 142
- Aggregate Functions 143
- How to Create, Update, Delete Records 144
- How to add multiple records at a time 144
- How to Delete a Single Record 144
- How to Delete Multiple Records 144
- How to Delete all Records(Truncate Operation in SQL) 144
- How to Update Field of a Particular Record 145
- How to Order queryset in Sorting Order 145

12) Working with Advanced Model Concepts 146

- Model Inheritance 147
- Abstract Base Class Model Inheritance 147
- Multi table Inheritance 148
- Multilevel Inheritance 149
- Multiple Inheritance 149
- Model Manager 150
- How to define our own Custom Manager 150
- Proxy Model Inheritance 152

13) Working with Django Middleware 155

- Middleware 156
- Middleware Structure 157
- Demo Application for Custom Middleware Execution Flow 158
- Execution Process for a Single Middleware Class 158
- Middleware application to show information saying application under maintenance 159
- Middleware application to show meaningful response if view function raises any error 160
- Configuration of multiple middleware classes 161

14) Deployment of our application in the Live Environment..... 163

- Deployment 164
- Need of Version Control Systems 164
- Git vs GitHub 164
- How to install git 165
- How to create account in github.com 165
- Git Respository 165
- Activtities related to Git Repository 165
- Deployment on pythonanywhere.com 169
- Open the console and Create Virtual Environment 169
- Which package already installed in this virtual env 169
- install django 169
- How to check whether django installed properly 170
- Copy our application from github to our virtualenvironment (pythonanywhere) 170
- Configuration on the web tab 171
- WSGI Configuration 171
- Add 'durgasoftdjango.pythonanywhere.com' to ALLOWED_HOSTS 172
- Static Files 172

1. Static files related to admin site 172
2. Static files related to our application 172

15) Real Time Project: Blog Application Development 173

- How to specify dropdown choice field in models.py 174
- slug field 174
- ForeignKey 174
- DateTimeField 174
- pytz module(python timezone module) 175
- Customization of Admin Interface 175
- Implementation of List View and Detail View By using FBVs 176
- Django Pagination 180
- How Pagination works 180
- Class Based Views For Pagination 181
- Mail Sending Functionality 182
- Adding Comments Section to the Blog 185
- Adding Tags Functionality To our application 189
- How to display similar posts 192
- Custom Template Tags 194
- 3 Utility Functions to define Custom Template Tags 194
- How to create custom template tag 195
- Usage of simple_tag to return number of posts published 195
- Usage of inclusion_tag to display Latest Posts 196
- Usage of assignment_tag to display Most Commented Posts 197

16) Introduction to Web application Development by using Flask 198

- How to install Flask 199
- How to Develop Application 199
- How to Run Development Server 199
- How to send Request 199
